SEE THEM GROW STRONGER

Fish Bone Meal makes the ideal organic fertilizer for all types of plants, trees and vegetables. It is a good source of calcium and phosphorous, essential for plants to flower and produce strong roots. It is particularly ideal for root vegetables such as onions, garlic, carrot and parsnip. Fish Bone Meal contains Nitrogen as well, which encourages plants to grow strong, besides promoting lush green foliage.

Fish meals' organic matter feeds the micro-organisms in the soil and maintains the bio-fertility of the soil. Plants find our fish meal easy to absorb and uptake. As it slow-releases the nutrients for months at a time, Fish Bone Meal is cost-effective as well.
