

ORGANIC MARINE NUTRIENT

WELL-FED SOIL GROWS WELL-FED PLANTS

PRODUCT	FISH SOLUBLE PASTE
PHYSICAL APPEARANCE	SEMI-VISCOUS PASTE
COLOUR	DEEP BROWN
VISCOSITY	< 3MINS AT ROOM TEMPERATURE
SOLUBILITY	PARTIALLY SOLUBLE IN WATER PASSES 100 MICRON MESH
RECOMMENDED FOR	ALL TYPES OF HORTICULTURE AND FIELD CROPS

ORGANIC MARINE NUTRIENT

WELL-FED SOIL GROWS WELL-FED PLANTS

Organic Marine nutrient is enzymatically extracted fish soluble from the fish. It is a brown, semi-viscous liquid, with a pleasant fishy odour. The unidentified growth factors present in fish soluble helps in increasing the rate of growth. The fish soluble is rich in all the dissolved proteins, vitamins and amino acids which act as a building block in the plant growth.

Apart from natural nitrogen it is also rich in naturally available macro and micro minerals which are very essential for the plant growth. It is free from chemicals or residues as the raw material is directly harvested from the sea. It also contains all the essential 22 amino acids required for growth.

ADVANTAGES

- Helps in promoting plant growth
- Adds more greenery and helps in Photosynthesis process
- Increased soil microbial activity
- Activates soil microflora
- Restores biological balance in the soil
- Improves soil health and fulfils deficiency of macro/micro minerals.
- Improves the health of the roots

DOSAGE

- Recommended to use at 25-50lit/hectare through drip.

PACKING

- 20 liter, 200 Litres Barrel, 1 ton IBC, 20 ton Flexi tank.
